Seen a host plant filled with butterfly eggs?
Seen caterpillars up close in all stages of life? See one eat?
Seen a butterfly lay eggs?
Seen a real butterfly chrysalis?
Met a real butterfly farmer?

ADMISSION PRICES

ADMISSION	\$8 EACH
Infants (under 2 years old)	FREE

Private tours are performed by reservation only, & require 20 or more paying participants. We accept all forms of payment. Call to schedule your tour today!

THE FARM IS CLOSED ON SUNDAY

FAMILY SHOWS

For families & other small groups that don't have the 20 person minimum for a private tour we offer Family Shows.

Family Shows are offered mid April through the beginning of October. Family Shows take place each Saturday at 10 a.m.

As we are predominantly a field trip facility, Family Shows are the ONLY time our farm is open for the general public to visit without a group reservation.

Arrive about 20 minutes early to get parked and paid. Shows are weather permitting, as all activities are outdoors. No reservations necessary for Family shows, just come and enjoy! We allow the first 150 participants on to the farm grounds for each show. Each show begins promptly at 10 a.m.

Visit our website to learn about additional Family Shows that may be offered during the summer.

WHAT YOUR GROUP WILL LEARN

When your group arrives at the farm, they will be led to an outdoor presentation area. Rustic wooden benches will welcome them to enjoy a delightful presentation about butterflies. While the presentation focuses mainly on the life cycle of the Monarch butterfly, we also talk to the group about food sources, raising caterpillars, body parts of the butterfly, migration information, differences in moths and butterflies, and other interesting but not widely known facts.

Children and adults alike enjoy the presentation, and everyone learns something about butterflies.

The presentation includes some demonstrations using volunteers from the audience - an especially fun time for all ages - laughter abounds! Allow 20 minutes for the presentation.

FLIGHT HOUSE TOUR

After the presentation, your group will be taken to the flight house. This is the favorite part of the trip for everyone! The entire life cycle of the butterfly is present in this environment. Host plants are loaded with newly-laid eggs, caterpillars in every

instar of development, and if the visitor is lucky, even Monarchs emerging from the chrysalis!

Members of the farm staff are present to explain, demonstrate, and educate your group. While we raise mostly Monarchs, we occasionally have other species in the flight house as well.

Best of all, you will be surrounded by lovely butterflies nectaring on a multitude of plants and flowers. The butterflies are quite friendly, and visitors can expect one or two to land on them - always a delight! Each visitor is given a small sugar stick to coax the butterflies onto. The butterflies love to drink the sugar water, and this gives guests the opportunity to get an upclose look of the butterfly.

A bubbling fountain located in the flight house, along with benches to rest, provide our guests peace and tranquility beyond compare! Allow 25 minutes for this portion of the tour.

PICNIC-PLAY AREA

Feel free to enjoy a picnic or snack in our picnic shelter after the tour. Our custom play area is meant to stimulate the imagination of visitors. Don't forget to take a walk down the interactive Nature Trail too! The farm goats love when visitors stop to feed them a snack. Stay & enjoy the farm!

PLANT NURSERY

The farm specializes in producing chemical free container grown host and nectar plants, for the benefit of all pollinators. Milkweed available throughout our season!

CATERPILLAR CASTLES

We offer an all natural life cycle kit for purchase known as the Caterpillar Castle.

A caterpillar castle consists of one potted milkweed plant, with two monarch eggs laid on the leaves, inside of a reusable netted enclosure. You will receive everything you need to raise butterflies in your very own home or classroom! The kit comes with a complete conservation pack, and detailed care instructions. You will be amazed watching the entire process. Life cycle kits available during our farm season, while supplies last! A wonderful gift idea!

\$25.00 per kit

DIRECTIONS

Located in the Piedmont traid on Clinard Farms Rd., across from Phoenix Academy. There is a large white sign at the top of our gravel driveway. Follow directional signs to the parking area. Call or visit the website for exact directions.
